Invent India TMT — Monthly Update

July 2026 • Extracted from presentation: 202607_Invent India Telco Media & Tech July 2026 Updates.pptx

Sold / Booking (as of Jun)
3,880 KE

TCV Pipeline (end Jun)
5,212 KE

Pipeline-to-Sold Coverage
~1.34x (target: 2.00x)

Revenue (as of Jun)
1,109 KE (46% of target)

Highlights — Quick summary

- Bookings (YTD) at 3,880 KE; Jun month performance tracked at 47% toward the YTD target (4150 KE by end-Jun).
- Pipeline TCV = 5,212 KE; 73% of Pipeline (≈3,803 KE) is in Stages 6 & 7 — priority for closure.
- Pipeline-to-Sold coverage compressed to ~1.34x (prior 2.25x → 1.36x in slides). Recovering to ≥2.0x is immediate focus.
- ARVE ≈ 73% (as of Jun). INTER CM (Contribution Margin) ≈ 53% (target 46%).
- People & resourcing: 47 resources on projects, Bench ≈ 10, 3 new joiners confirmed, 4 hires planned.

Key takeaways & recommended actions

- Accelerate closure efforts for INTER pipeline opportunities in Stages 6 & 7 — these comprise the majority of near-term booking potential.
- Leverage bench resources for RFP activities: align bench to bid codes and prioritize rapid deployment where it helps win deals.
- Account owners for INTER accounts: explore new roles within existing engagements and prioritize conversion-focused actions.
- Plan rapid deployment of three new lateral hires joining in Aug 2026 to active opportunities for quick ramp-up.
- Drive AI skills adoption through self-paced learning, internal “AI for Us, From Us” forums, and assigned trainings so resources are ready for upcoming AI-driven opportunities.

Performance by market & accounts (extract)

Top markets (Booking / Pipeline samples):

NA: Booking ~1,638 KE (Pipeline ~820 KE) ANZ: Booking ~318 KE (Pipeline ~449 KE)
India: Booking ~229 KE (Pipeline ~276 KE) SCE: Booking ~845 KE (Pipeline ~320 KE)

NCE: Booking ~789 KE (Pipeline ~1,100 KE)

Other notable countries listed in slides: Germany, Egypt, UK

Focus: convert accounts with high pipeline into sold bookings.

FoP / Advisory snapshot

FoP (Field of Play) totals

FY26 Target (Total FoP): 4,075 KE • Achieved: 2,352 KE (~58% achieved — to be recalculated)

Advisory / Solution targets

Total advisory target shown in slides: 2,650 KE across capability owners (GenAI, BA, PM, SFDC, EA, etc.)

RFPs & Proactive pitches (selected)

- Tuatahi
- Telia
- T-Mobile
- Vodafone (and Fastweb consolidation)
- CWS, Nokia, Fastweb, VMO2, O2 Business
- Comcast (XTO Experience Transformation)
- IndiGo AI Innovation Lab (airline AI products)
- CMA CGM R&D Hub (GCC) — AI, Robotics, Digital Twins
- Nuuday provisioning/assurance transformation

Demo — Co-pilot driven dashboard

The team demoed a browser-driven dashboard that automatically ingests THOR opportunity reports and builds executive-ready dashboards for weekly THOR reviews. It covers bookings, pipeline health, account insights, stage movement, ageing pipeline and opportunity-level actions — reducing manual prep and speeding governance.

Open original presentation

People corner

- New joiners confirmed: 3 • Planned hires: 4
- Bench: ~10 • Projected headcount target for TMT: ~58
- Encourage cross-domain opportunities to accelerate learning and address pipeline gaps

Next steps & owners

- Owners of INTER accounts to prioritize Stages 6 & 7 — target owners: Account teams (callout in slides).

- FoP owners: accelerate advisory-led conversations where target attainment is low — see FoP table in slides.
- Recruiting & deployment: HR & Delivery to coordinate rapid lateral deployment in Aug 2026.
- Action: Schedule THOR deep-dive for accounts that represent top 60% of pipeline value (suggested by leadership).
